Course Evaluation

Summary of student's answers:

Only 6 students answered the questionnaire. It seems they appreciated how the course was taught, both lectures and seminars. Some positive constructive critics was also given. The improvements include 1) more structured and detailed exposition on the blackboard (less explained orally) 2) more time spent on the Fourier transform.

Teachers' comments:

It is a nice course to teach and it seems to be very interesting for students. I agree with students that more time should be spent on the Fourier transform.

Changes from the previous course realisation:

No.

Suggestions for the next course realisation:

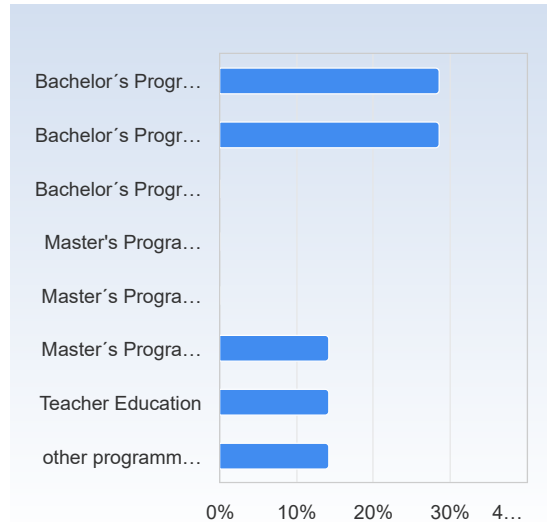

See suggestions 1) and 2).
